

ICAR AIEEA PG 2026 Agronomy Analysis

- Agroforestry and Integrated Farming took up the lion's share of questions in this section
- Agrometeorology and Organic Farming were barely touched upon, with very few questions
- Irrigation questions leaned on data interpretation
- Nutrients got a fair amount of coverage
- Water Management was almost skipped, with hardly any questions
- Soil & Tillage Implements accounted for around 10 questions
- Weeds saw just 3-4 questions
- Institutes-related questions numbered around 5
- Dryland Agriculture had a modest 2-3 questions
- Crops featured around 5 questions
- General Agriculture made up a good chunk with around 20 questions
- Crop Physiology (CPHY) ranged between 3-5 questions
- Overall, candidates found this paper easier than previous years' attempts
