

ICAR AIEEA PG 2026 Physical Sciences Analysis

Soil Science

- Overall paper difficulty leaned towards the tougher end
- Soil Fertility saw around 10 questions
- Soil Physics had a strong presence with 17+ questions
- Soil Pedology followed closely with 15+ questions
- General Agriculture contributed the most, with 24+ questions
- Soil Meteorology brought in 14+ questions
- Agrometeorology had a modest 3-4 questions
- Question format was mostly Assertion-Reason (AR), True/False, and Multiple Statement Selection types, with only 10-15 questions being simple one-liners
- Options were closely worded, making elimination genuinely tricky
- PYQs didn't repeat at all this time — even after practicing the last 5-6 years' papers multiple times, none of those questions turned up
- Crop Production threw in a few tough, unfamiliar questions that hadn't appeared in previous years' papers
