

MHT CET 2022 Question Paper August 5 (Memory Based)

Ques. How many atoms are in a bcc unit cell?

Ques. Find Density

Ques. Froth is a Solution of?

Ques. The first oxidation of a secondary alcohol is?

Ques. Dows process is used

Ques. The highest oxidation state of manganese is?

Ques. Polymers used for making toys are?

Ques. The radius of the third bohr orbit for H₂ is?

Ques. The number of sigma bonds in vanillin is?

Ques. Which is the most unstable carbocation?

Ques. Aldol condensation between which of the following compounds followed by dehydration gives 4-Methylpent-3-en-2-one?

1. Two Molecules of CH₃COCH

2. Two Molecules of CH₃CHO

3. CH₃CHO and HCO

4. CH₃CHO and CH₃COCH

Ques. Which of the following is not a transition element?

1. Sc

2. Pt

3. Ag

4. Zn

Ques. Father of green chemistry is?

Ques. Relation between P_1 and P in vapor pressure?

Ques. Variation of capacitive reactance

Ques. Thermal Conductivity

Ques. Intensive Property

Ques. Find resistance in a delta shape terminal.

Ques. Find ratio of the final surface energy

Ques. Calculate the phase angle

Ques.
